

AUSTRALIAN INDUSTRY CAPABILITY (AIC) PROGRAM

Statement of Commitment

At BGIS, we are deeply committed to fostering a robust and resilient Australian Industry. Guided by the Australian Industry Capability (AIC) Program principles, we pledge to actively support and engage with Australian industries, particularly in Defence procurement.

Our commitment is rooted in a strategic approach that prioritises the inclusion of local businesses, small to medium enterprises, and Indigenous enterprises in our supply chains. We understand the importance of developing a sustainable and competitive Australian defence industrial base. To this end, we will ensure that our procurement practices and business strategies align with the AIC Program's objectives. This includes market testing to explore opportunities for Australian industry participation, ensuring technology transfer, and supporting innovation, research, and development within Australia.

Our engagement with the AIC Program is more than a compliance measure; it is a core part of our mission to contribute to the national economy and support the long-term development of Australian industry. We are dedicated to maximising the economic benefits of our operations to the Australian community. We will regularly review and adjust our strategies to meet the evolving needs of the Defence sector.

BGIS is proud to play a role in building a stronger, more capable Australian industry. We look forward to collaborating with partners across the industry to achieve our shared national development and security objectives.

Dana Nelson
President and Managing Director - APAC
