

SENIOR LIVING AND AGED CARE

INTEGRATED FACILITIES MANAGEMENT
AND TRADES SERVICES

BGIS partners with aged care providers to efficiently and cost effectively manage their residential and community living properties.

About us

BGIS is a leading provider of facility management services, project delivery services, energy and sustainability solutions, building performance management, workplace advisory and management, real estate services and trades services.

Our talented team of over 10,000 people operates across offices in Canada, United States of America, Australia, Asia and New Zealand. Our clients are from a diverse range of sectors, including aged care, healthcare, defence, justice, government, education, utilities, finance, telecommunications, property, resources, oil & gas and sport & leisure.

We manage over 50,000 client locations totaling more than 50 million square metres in a portfolio of aged care facilities, hospitals, corporate offices, retail, universities, schools, venues & stadiums, institutions, bases, remote townships, warehouses, industrial assets and data centres.

Safe and compliant technical solutions

Our clients achieve operational and cost efficiencies through streamlined management of expenditure with energy procurement, supply chain, asset maintenance and lifecycle asset management. We ensure standards for accreditation are met across quality, compliance, risk mitigation, service delivery and safety outcomes. An integrated service model ensures that there is seamless service delivery with reduced duplication, minimised overheads and volume efficiencies.

Industry experts with state-of-the-art technology

We have a reputation for being the technical leaders, underpinned by our engineering heritage, critical environments expertise, asset management technology and our technical services capability. Our qualified experts and professionals ensure critical safety, compliance, sustainability and business continuity objectives are always achieved.

- Villa Maria

Asset Management Services, Silverchain, Australia-wide

BGIS undertook the asset management of 37 buildings in Silverchain’s portfolio. This involved a detailed asset register of serviceable plant and equipment, a high-level holistic assessment of the overall condition of each building asset, an audit including a CAPEX budget, risks’ identification and implemented myBuildings™ Software.

Energy Procurement, Healthcare provider, Western Australia

BGIS completed a tender specification, analysis and recommendation review for the procurement of Electricity & Gas supply for 11 healthcare sites cross Western Australia. The client is saving \$1.2M per annum as a result of this review.

Essential Services, RSL LifeCare, New South Wales

BGIS provides essential services to this leading provider of aged care and senior living residences, and veteran services. The contract involves providing integrated trades services with asset management and a 24/7 call centre.

The sites are predominantly retirement villages and aged care homes, as well as offices, common areas, function rooms, halls and even a museum.

Juniper Residential Aged Care Facilities

We provide building condition audit and provision of a life cycle cost analysis at Juniper Hilltop Residential Aged Care Facility. Also providing energy procurement, solar installation, water auditing, backup generator feasibility and installation.

MercyCare

Completed asset management plans for 17 sites, energy procurement, solar, and net zero roadmap and energy benchmarking.

Brightwater Group

Completion of fire services tender, landscape maintenance tender, and electricity procurement across 23 sites.

Bolton Clarke

Completion of asset register and lifecycle costing and 10-year lifecycle planning and implementation of Computerised Maintenance Management System (CMMS) myBuildings™ system across 22 sites in NSW and WA.

Energy & sustainability solutions

At BGIS we offer tailored sustainable solutions to improve the efficiency and performance of your assets and your site. As experts in the built environment our aim is reduce greenhouse gas emissions on-site, operate in a low carbon manner and support the built environment to grow in environmentally sustainable and economically viable ways.

We offer our clients industry leading solutions to sustainability challenges and opportunities including:

- Asset management
- Building improvement
- Energy & water
- EV Charging
- Facility advisory
- NABERS & BEEC
- Renewable energy – commercial solar & battery
