

Helping to create a better patient experience.

At BGIS, we deliver integrated facility management services for leading hospitals and healthcare providers, trusted to manage many significant portfolios, heritage assets and critical environments.

Our integrated facility services range from acute care and ICU to rehabilitation and research clinics. With a collaborative approach, our multidisciplinary team, work with your staff to provide better patient care - both now and for the future.

Our team of professional experts is always available 24/7 to ensure that you and your team always experience the highest standard of support and performance.

Trusted to manage critical environments

BGIS is a leader in the management of critical environments and has a portfolio of clients across Australia and New Zealand. Critical environments within healthcare facilities are unique and complex, and we understand the need to bring together people, processes and technology to deliver reliability and optimum facility performance that ensures patient, staff and visitor safety and well-being.

We successfully manage operating theatres, data centres, laboratories, security rooms, and power utilities. Our qualified experts and professionals ensure critical safety, compliance, sustainability and business continuity objectives are always achieved.
